

Electronic Devices and Circuit Fundamentals

Editors:

Dale R. Patrick, USA

Stephen W. Fardo, Eastern Kentucky University, USA

Ray E. Richardson, Eastern Kentucky University, USA

Vigyan (Vigs) Chandra, Eastern Kentucky University, USA

This book explores many fundamental topics in a basic and easy-to-understand manner. It, and the accompanying DC-AC Electrical Fundamentals by the same co-authors, have been developed using a classic textbook – Electricity and Electronics: A Survey (5th Edition) by Patrick and Fardo – as a framework. Both new books have been structured using the same basic sequence and organization of the textbook as previous editions.

This book has been expanded to 22 chapters, further simplifying content and providing a more comprehensive coverage of fundamental content. The content has been continually updated and revised through new editions and by external reviewers throughout the years. Additional quality checks to ensure technical accuracy, clarity and coverage of content have always been an area of focus. Each edition of the text has been improved through the following features:

1. Improved and updated text content
2. Improved usage of illustrations and photos
3. Use of color to add emphasis and clarify content.

River Publishers Series in Electronic Materials, Circuits and Devices

ISBN: 9788770227414

e-ISBN: 9788770227360

Available From: May 2023

Price: € 121.00 \$ 150.00

KEYWORDS:

Electronic Devices, Electronic Circuits, Atomic Theory, Semiconductor, P-N Junction Diodes, Zener Diodes, Tunnel Diodes, Varactor Diodes, Varistor, Schottky-Barrier Diodes, PIN Diodes, IMPATT Diodes, Power Supplies, Rectifiers, Diodes, Filters, Voltage Regulators, Clipper, Clamper, Voltage Multiplier, Bipolar Junction Transistors (BJTs), Amplifiers, Load Line Analysis, Field Effect Transistors (FETs), Power Amplifiers, JFETs, MOSFETs, Biasing, Amplifier Gain, Decibels, Amplifier Coupling, Transducers, Unijunction Transistors (UJTs), Thyristors, Silicon Controlled Rectifiers (SCRs), Triacs, Diacs, Optoelectronic Devices, Light-Emitting Diodes (LEDs), Phototransistors, Integrated Circuits (ICs), Operational Amplifiers, Linear Circuits, Non-Linear Circuits, Frequency Response, Active Filter, Oscillator Circuits, Radio Frequency (RF) Circuits, Communication Systems, Modulation (AM), Frequency Modulation (FM), Television
